Dear Members of the Committee,

Thank you for allowing me this opportunity to present testimony in favor of House Bill (H.B.) 2736, which will encourage greater rehabilitative success among individuals with certain offenses, resulting in significant taxpayer cost savings, increased public safety, and strengthened communities.

**COMMUNITY SUPERVISION ALTERNATIVES WILL INCREASE PUBLIC SAFETY, PERSONAL RESPONSIBILITY, AND COST SAVINGS**

The state jail system was originally designed to improve the state criminal justice and corrections systems by redirecting individuals with low-level offenses out of overcrowded prisons, providing them the opportunity to serve their sentence on community supervision while reserving space in prisons for those who posed a higher risk to public safety.¹ Community supervision often provides a better, less expensive opportunity to obtain meaningful services and resources that address substance abuse issues, mental health issues, employment problems, etc. By way of comparison, state jails are dramatically more costly (averaging nearly $43 a day per person) than incarceration alternatives such as community supervision ($1.38 a day per person) and diversion treatment (less than $7 a day per person).²

Most importantly, while the creation of state jail felony offenses was intended to carve out a population of individuals more amenable to rehabilitative services and treatment programs, **persons convicted of state jail felony offenses actually have a higher rate of recidivism than individuals exiting prisons and those on community supervision.** This may be due to the lack of rehabilitative programming provided at state jail facilities, the relatively short terms of incarceration that prohibit engagement in effective treatment programs, or the lack of post-release supervision and structured support in the community. Yet today, tens of thousands of Texans, primarily with low-level drug or property offenses, are sentenced directly to state jail.

**H.B. 2736 will address systemic failures in the state jail system that have resulted in increased taxpayer costs and decreased public safety by offering a split-sentencing alternative for state jail felons.** H.B. 2734 will allow individuals convicted of a state jail felony to serve one-half of their sentence in a state jail facility, followed by an automatic placement on community supervision, where they would have access to important community-based programs and services that will increase their chances of success upon reintegrating to the community. With both the probation and state jail systems sharing the load, Texas will be promoting public safety while efficiently using taxpayer dollars.

**KEY FINDINGS**

**STATE JAIL RECIDIVISM RATES:** 31.1% of individuals released from a state jail in FY 2009 (measured through FY 2012) were re-incarcerated.³ By way of comparison, 22.6% of individuals released from prison in FY 2009 (measured through FY 2012) were re-incarcerated⁴ and an average 14.8% of individuals on felony direct supervision were revoked from their probation from FY 2008 through FY 2012.⁵

**STATE JAIL POPULATION AND COST**

- In Fiscal Year (FY) 2012, there were nearly 12,000 individuals on hand in a state jail facility (8% of all individuals incarcerated) and over 23,000 new receives throughout the year.⁶ Incarcerating these men and women cost taxpayers over $500,000 a day and over $180 million annually.⁷
- In FY 2012, nearly 23,000 individuals were released from such facilities that fiscal year.⁸

Continued on reverse.
STATE JAIL DEMOGRAPHICS:

- About 85% of individuals in a state jail are there for nonviolent drug or property offenses.\(^9\)
- Over 50% of individuals in a state jail are there for their first or second offense.\(^10\)
- The majority of individuals are in for drug possession (nearly 30%), followed by larceny and burglary.\(^11\)
- The average state jail sentence is 1.02 years. The average time spent in a state jail is about 6 months.\(^12\)

COST-SAVING AND PUBLIC SAFETY-Driven SOLUTION: SUPPORT H.B. 2736 BY VICE CHAIRMAN WHITE

- **H.B. 2736 will improve public safety by providing a short term of confinement for individuals convicted of a state jail felony, followed by a term of community supervision.** Most individuals serve a short term in a state jail facility, often without the benefit of rehabilitation treatment or other services. By providing a follow-up term of community supervision, individuals will have access to rehabilitative programs and resources that will better ensure a successful reintegration to the community. Furthermore, by implementing a period of community supervision, H.B. 2736 will provide an appropriate measure of accountability and supervision; this will decrease the likelihood a person will reoffend and ultimately improve public safety.

- **H.B. 2736 will also decrease costs to taxpayers by reducing the period of confinement in a state jail facility and placing individuals convicted of a state jail felony on a term of community supervision.** Please see the attached document on the cost savings that would accompany a split-sentencing scheme for state jail offenses, including short-term cost savings of up to $26.6 million per year and long-term cost savings of up to $128 million per year.

CONCLUSION

Thank you again for allowing me the opportunity to testify in favor of H.B. 2736. The Texas Criminal Justice Coalition strongly urges you to support this bill, which promotes increased rehabilitative success and will ultimately result in significant cost savings and recidivism reductions.
